

MD KHIZAR SHEZAN M

Vaniyambadi, Tamil Nadu | shezankhizar@gmail.com | github.com/khizarshazan | linkedin.com/in/khizarshazan

PROFESSIONAL SUMMARY

Computer Science undergraduate with practical experience in data analytics, Python development, SQL, Power BI, and exploratory data analysis. Built multiple end-to-end projects involving data cleaning, analysis, visualization, dashboard development, and database workflows using real-world datasets across e-commerce, sports analytics, and macroeconomic data. Also comfortable with software development using Python, Flask, MySQL, and Bootstrap. Seeking entry-level opportunities in Data Analytics, Business/Data Intelligence, or Python/Software Development where I can contribute with strong analytical thinking, problem-solving, and hands-on project experience.

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML, CSS

Data Analytics & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Microsoft Excel

Databases: MySQL

Development Tools: Git, GitHub, VS Code, Jupyter Notebook

Web / App Development: Flask, Bootstrap

Core Strengths: Data Cleaning, Exploratory Data Analysis, Dashboard Development, Data Storytelling, SQL Querying, Data Visualization, Business Insights Reporting

PROJECTS

E-Commerce Sales Dashboard

Tech Stack: Python, Pandas, MySQL, Power BI

- Built an end-to-end data analytics project using 118,000+ Amazon e-commerce sales records to analyze revenue trends, order volume, and fulfillment performance.
- Cleaned and transformed raw transactional data with Python and Pandas, then loaded the processed dataset into MySQL for structured storage and querying.
- Designed an interactive Power BI dashboard to monitor key business KPIs including **₹78.59M** revenue, 110,687 total orders, and **₹661.35** average order value.
- Identified operational fulfillment distribution, showing 69% of orders fulfilled by Amazon and 31% by merchants.

IPL Player Performance Analyzer

Tech Stack: Python, Pandas, Matplotlib, Seaborn

- Analyzed 1,169 IPL matches and 278,000+ ball-by-ball records across 18 seasons (2008–2024) to uncover player, team, and match-level insights.
- Built visual analytics to identify top run scorers, top wicket takers, most successful teams, season-wise boundary trends, and total matches played per season.
- Evaluated the impact of toss decisions on match-winning outcomes, helping surface strategic trends across seasons.

Real-World Data Story: Global Inflation Analysis

Tech Stack: Python, Pandas, Matplotlib, Seaborn

- Developed a data storytelling project analyzing global inflation trends from 2020 to 2024 across multiple countries to study the economic effects of the COVID-19 period.
- Explored inflation, food price index changes, and interest rate movement using Python and Pandas for cleaning, filtering, and comparative analysis.
- Highlighted post-2021 inflation peaks, food price surges, and the relationship between inflation and interest rates across countries.

AI-Powered Resume Analyzer

Tech Stack: Python, Flask, MySQL, Bootstrap

- Built a web-based application that compares resume content with job descriptions and highlights matching and missing skills.

- Developed the application workflow using Python and Flask and integrated MySQL for storing and managing data.

EDUCATION

Bachelor of Science in Computer Science

Islamiah College (Autonomous), Vaniyambadi

CGPA: 7.04/10 | Expected Graduation: May 2026

Higher Secondary — MPC (Computer Science)

Adarsh Matric Hr. Sec. School, Vaniyambadi

Score: 74% | March 2023

ADDITIONAL INFORMATION

Languages: English, Urdu, Hindi, Tamil | Career Interests: Data Analyst, Business/Data Analytics, Python Developer, Software Developer
